

How do these people have the facts of the quantum field and the facts of dark energy and dark matter for decades and only now are they starting to be able to understand it's one and the same and it's a non fluxed matrix when theirs no matter on it. It takes my notes being stolen on the practical applications of their number crunching. These people on these podcasts are the most over hyped people in the industry. These people are supposedly at the forefront of the unexplained. It seems that the unexplained is still unexplained because retards like these are experts in it. And now Joe Rogan is a physicist ? And you think these faggots didn't steal my notes and keep hacking my inventions from my website while in Slovenia , California and Iceland. Now Joe "the hills have eyes" Rogan is in on advanced astrophysics.lol. that country is a joke , they should have done their jobs in government and you wouldn't be led by pod caste losers who need the caste system to move their careers. When I listen to these people speak it's as if 5 year old boys are inhabiting their bodies. The emotional capacity on these podcaste champions is thick, I may as well watch trump and Vance yell "he didn't say thank you" or "I'm not touching you!" If I'm going to watch these hacks pretend they came up with my theories and common sense. And if you notice watching these cattle thief manbabies they like all immature Indians, cavepeople and Latinos immediately take the position of being entitled and having the attitude of "I know something you don't". These people are using occult crimes and gang stalking to constantly steal from a real genius and real business person born in NYC. It's very bad in that country having people on my team that are and have been dumb enough to let retards like these get to someone like me. The USA is a complete caveperson Zionist shit hole and if you check the aerial photos of NYC it looks more like India or some other 2nd to 3rd world shit hole. I guess that's what happens when hacks like green are the head of the physics department in columbia university , it's an Indian free-for-all in the usa with the cave people zionists. Their's no way to have a business economy or a system that works when Jews come into a country. And they all act so fucking smart with education they memorized from people in my genetic lines and their dynamic minds. American multicoloured lying murdering cavepeople. Watching these morons entire attitude on physics change and their new certainties on hypothesis they should have come up with decades ago is so retarded , I am so happy I'm out of that low iq cattle Jew country. I'm now timestamping more of my writings day by day and I should have joe Rogan and a bunch of these Hollywood faggots behind bars that I know from Beverly hills, Santa monica and belair where the real faggots roam. Lol Joe "the hills have eyes" Rogan understands more about the quantum field than other physicists I'm smarter than,what a low low low IQ joke the USA has become. And my own people are too arrogant to believe I'm this smart, and that I'm smarter than them when I only have a 7th grade education, so due to my own people winning the title of "dumbest most arrogant motherfuckers on earth" our women are constantly being raped and obducted and our treasuries are completely empty and our military is under control of Hindus, Latinos Jews and other cavepeople/Indians (Jews inclusive) and now instead of having to get through layers of Roman centurions these desert cockroaches and jungle cavepeople can just hand pick who they want to rape or abduct right at the local mall or school or nightclub. These podcaste lowlifes are part of this same California foreigner caste system. I'm very happy I'm away from the USA and my intermixed family of nasty Jews and Indians pretending their Europeans. Fyi many of the Greeks are spicks from the Americas, this is why Greece has so many problems with Soros and

the Jews , these Latinos are with the American Zionist cavepeople, they are supporting them through all sorts of government employment positions and the Europeans don't understand these brown people are from Latin America and indies islands crossmixed to look a little European, these are more spicks.

And listening to the theological bullshit out of kakus mouth about thought traveling faster than light and his example of a positive and negative electron being brought to separate ends of the universe and that you would know that the negative is a negative from across the galaxy and universe from knowing the electron you possess on your side of the universe is a positive . That is such retard shit. You would need to know the electron got to the other side of the universe and who's to say that the spin didn't flip to a negative on the other side of the universe or a neutral possibly. These people are a waste of money to see in person and a waste of time to watch on these podcasts. These people are in fact regergitative morons holding onto some physics limelight and a huge ego they created in their own minds. To someone with a high iq nothing they say makes sense except a few truths their finally linking together about the quantum field. I am surprised they are starting to understand gravity and how it's different than what they preached about for the past decades of their over inflated egos. But good job memorising the equations. You get two stars for that.

High tide always being high. I think they are high. The ocean bulges are not always there. The water passes through quanta by quanta just as the land masses pass through the fluxed area of the grid that's effected by the vacuoled gravitational sensation. The water is not bulged till it's back in the region where the field is fluxed again from the vacuoled sensation of gravity. Which may be what they intended to explain but they did a very poor job of another analogy if that's the case. These people are supposed to be authorities on electrics and it sounds like their experts only in bullshitting.

By the time I was 18 years old I continuously watched the home shopping network after flipping through over 60 channels repeatedly. And why? Because they were the only network on TV honest about selling something. I can still do the knife show guy impression pretty well too.
